

# EuroLab-4-HPC

## Foundations of a European Research Center of Excellence in HPC Systems

Coordinator: **Per Stenström**

Chalmers University of Technology

Sweden

[www.eurolab4hpc.eu](http://www.eurolab4hpc.eu)

# Mission: EuroLab-4-HPC will join HPC Systems Research in Europe

## Gap:

- ETP4HPC and Prace have joined user and provider HPC stakeholders
- HiPEAC has joined advanced, high-performance computing researchers

*EuroLab-4-HPC: Join HiPEAC with HPC stakeholders*

## Mission:

- Join systems research and other stakeholders around a common long-term research agenda
- Train future technology leaders
- Accelerate innovation

*Vision: Making Europe a Leader in HPC Technology*

# Objectives

To

- **join HPC system research groups** around a long-term (7-15 years) HPC research agenda by forming an HPC research roadmap and joining forces behind it
- **define an HPC curriculum** in HPC technologies and best-practice education/training methods to foster future European technology leaders
- **accelerate commercial uptake** of HPC technologies
- **build links** between the HPC research community and other stakeholders (suppliers, venture capital, etc)
- **form a vision** for a future Centre of Excellence on HPC systems

# A Long-term HPC Systems Research Agenda

- Moore's Law is running out of steam
- Beyond Exascale computing systems
- Disruptive technologies across the stack
- 7-15 years

**Cross-cutting issues:**  
Performance, energy,  
dependability, programmability,  
scalability etc

# Linking the Communities

- Common research platforms as a vehicle to join forces around common research goals
- **Instrument: Cross-site visit program**
  - EuroLab-4-HPC launched a call 2015
  - About ten cross-site visit projects were launched
- Linking also communities
- HiPEAC <-> ETP4HPC (HPC industry)
- Venture capital

# HPC Curriculum

- Inventory of needs and supply of HPC courses for future HPC technology experts
- Focus is on
  - Defining a curriculum
  - Best practices for on-line learning
  - Launch of training pilots

# Acceleration of Innovation

- Long “pregnancy” for bringing a research idea to commercial uptake

- Agility is needed: Intellectual Asset

- **Instrument:** Funding of Business Prototyping Projects (BPPs)
  - Funding for testing business hypotheses against customers
  - Call closed April 15. New call 2017.

# Vision: A Sustainable Centre of Excellence on HPC Systems

Suppliers of  
HPC  
technology

Innovation  
Network

# Consortium

- Expertise spans system layers from applications via system software to platform architecture
- Strong links to HiPEAC, ETP4HPC, PRACE and EXDCI

**CHALMERS**

# Thank you!
